

Paredes da Vitória

Vila Fundada por D. Dinis, teve foral em 1382, 1386 e outros por D. Manuel em 1514. It had an important harbour that has progressed until the fourteenth century. However, the strong winds that threw sand led to its total de population, and to the change of the parish from Paredes da Vitória to Pataias in 1536.

In the nineteenth century, its population begins again leading to the current place. The Rock called "castle" divides Paredes beach and Polvoeira beach.

Through the valley, various mills of water can be found. In South, there are the ruins of Azeche Mine, which is considered the first oil exploration in the country, in 1844.

Today, it has a camping and a picnic area which has a chapel built in the reign of D. Dinis.
